### Fossil Fuels Fix: True Costs versus Health Savings of Phase-out

Global annual heat-related mortality costs  
**> us\$240 billion.**

Using a coal boiler results in average health-related costs of **€1,200/household/year** in the EU and UK.

US health costs from fossil-fuel air pollution and climate change:  
**> \$820 billion/year**

Health and economic costs from burning fossil fuels totalled **us\$2.9 trillion** in 2018  
= 3.3% of global GDP  
= **us\$8 billion/day**

Air quality improvements made in the EU 2015-2018 including by closing coal power stations, offer health savings of **us\$8.8 billion/year**.

If global warming  $\leq 2^\circ\text{C}$ , ozone pollution would fall and improve crop yields:  
**> us\$10 saving per capita** in Spain and US  
**> us\$8 saving per capita** in Argentina, Brazil, Canada, Greece, Paraguay, Turkey, Turkmenistan, Uzbekistan by 2050

Highest costs of adaptation for climate change-related diarrhea, malnutrition, and malaria are projected to be in the Global South.

In China and India, costs of reducing GHG emissions could be fully offset by **savings from health co-benefits**, and in the US and EU, partially offset.

**Manav Mangal Seva Sansthan (Rajasthan) is appreciated by the local press for their efforts in supporting the rural communities in safeguarding them from Tuberculosis, a dreaded disease in the state**

## **“END NOTE”**

Last month, we have celebrated the completion of 75 years of Indian Independence with pride and honour that boosted our morale to do more what we do the best in last so many months to achieve the 169 set-targets of 17 SDGs by 2030.

In the month of June 2018, we had started our first issue of **PARTNERS PAGE** as a humble monthly publication with a total circulation of 1,000 copies to all partners and patrons. Post 50 months of consistent efforts, we are proud to reach 5,000+ global institutions and 50,000+ individuals on a monthly basis.

We are honoured to publish the 52<sup>nd</sup> Edition of **PARTNERS PAGE** for your ready reference of our activities in India. However, all the earlier volumes have been made available in both of our websites that can be reached by you at any time.

<https://aihms.net/e-newsletter.html>

<https://www.vikashsamukhya.in/e-newsletter.html>

However, sadly enough the severe outbreak of **COVID-19** in April 2020 has led to many of our consortium members doing their best to help the cause by supporting the marginal and outreach communities living in remote areas of different backward districts in India.

The current issue of **PARTNERS PAGE** is being published as a tribute to all our 535 CSO Partners all over India, working on 17 SDGs across 25 states and 2 union territories. **The 4<sup>th</sup> wave of COVID-19 is still threatening us at this hour, and we need your help and support,**

Look forward to working with you in near future,

**~AIHMS-Global & VIKASH-SAMUKHYA Team**
